

Exothermic Welcomes Distinguished Management Talent

Kenilworth, NJ – Exothermic, Inc. is entering a new era of innovation and operational excellence, and we are delighted to introduce two distinguished leaders who will play pivotal roles in our journey. President Paul Steck proudly announces these accomplished individuals who are poised to drive the development and delivery of exceptional solutions, surpassing the expectations of our valued customers.

Introducing Joseph Bintner: Our Seasoned Plant Manager

Joseph Bintner, our new Plant Manager, is the embodiment of experience and operational efficiency. With a rich history in the industry, Joseph ensures our operations run seamlessly. As a certified Six Sigma and Lean manufacturing expert, he brings an cache of optimization techniques that promise to enhance productivity and efficiency. Joseph's expertise, honed through years of leadership in prominent manufacturing firms, positions him as a driving force behind our streamlined workflow and punctual delivery.

Meet Damon Johnson: A Visionary Manufacturing Technologist

Exothermic's unwavering commitment to excellence is perfectly embodied by Damon Johnson, a visionary in the realm of Laser Scanning and Additive Manufacturing. Damon brings a wealth of experience to our team, setting the stage for groundbreaking advancements in our operations. His remarkable contributions include the pioneering use of 3D laser scanning for part reverse engineering and the precise metrology for inspecting and validating geometry. This cutting-edge technology, widely adopted by industry leaders in sectors such as automotive and aerospace, empowers us to replace out-of-production parts, recreate intricate components with unparalleled precision, and elevate our design modification capabilities. With Damon at the helm, we're embarking on an exciting journey of redefining manufacturing technology.
